Array.from()

El método **Array.from()** crea una nueva instancia de **Array** a partir de un objeto iterable.

Pruébalo

JavaScript Demo: Array.from()

```
1 console.log(Array.from('foo'));
2 // expected output: Array ["f", "o", "o"]
3
4 console.log(Array.from([1, 2, 3], x => x + x));
5 // expected output: Array [2, 4, 6]
6
```

Run ›

Reset

Sintaxis

Array.from(arrayLike[, mapFn[, thisArg]])

Parámetros

arrayLike

Objeto iterable para convertirlo en un array.

mapFn Opcional

Función de mapa para llamar a cada elemento de la matriz.

thisArg Opcional

Valor para usar como `this` al ejecutar `mapFn`.
