Math.floor()

The **Math.floor()** function always rounds down and returns the largest integer less than or equal to a given number.

Try it

JavaScript Demo: Math.floor()

```
1 console.log(Math.floor(5.95));
2 // expected output: 5
3
4 console.log(Math.floor(5.05));
5 // expected output: 5
6
7 console.log(Math.floor(5));
8 // expected output: 5
9
10 console.log(Math.floor(-5.05));
11 // expected output: -6
12
```

Run › Reset

Syntax

Math.floor(*x*)

Parameters

x

A number.

Return value

The largest integer smaller than or equal to *x*. It's the same value as [-Math.ceil\(-x\)](#).

Description

Because `floor()` is a static method of `Math`, you always use it as `Math.floor()`, rather than as a method of a `Math` object you created (`Math` is not a constructor).

Examples

Using `Math.floor()`
